Objective

Motivated Web Developer with over two years of experience designing and building scalable, high-performance web applications. I specialize in turning complex ideas into intuitive, user-friendly digital solutions that enhance user experience and drive business results. Skilled in both frontend and backend development, including database management and API integration. Experienced in creating responsive, accessible, and visually engaging interfaces. Passionate about staying up-to-date with the latest web technologies and best practices to deliver innovative solutions. Committed to producing efficient, reliable, and high-quality projects that meet client and business goals.

Education Qualification

Bachelor's Degree, Computer Engineer
Islamic University of Gaza   **2018 - 2023**
GPA: 94.3

Experience & Internships

Full stack Web developer at Trilium Soft   **2022 – 2024**

I have hands-on experience in backend development using **Laravel**, where I designed and implemented scalable applications, managed and optimized databases, and built reusable code to streamline development and reduce costs. I contributed to the development and integration of **RESTful APIs**, collaborating closely with frontend using **React.js** and **Next.js** to deliver seamless, high-performance user experiences. Additionally, I implemented **SEO optimization strategies** to improve website visibility and rankings, and developed **secure payment processing systems** for e-commerce platforms, ensuring smooth and reliable transactions.

Web Developer as Freelancer   **2022 – 2025**

I work as a Freelance Web Developer, specializing in designing and implementing customized web solutions tailored to clients' unique needs. With proficiency in multiple programming languages and frameworks, I have developed responsive, user-friendly websites and applications that deliver seamless digital experiences. I am highly motivated to stay current with the latest web technologies, ensuring efficient, timely, and high-quality project delivery.

Projects

"Who Wants to Be a Millionaire" Game   **Link preview**: who-will-million.netlify.app

Designed and developed an interactive web-based game inspired by "Who Wants to Be a Millionaire". The game includes a multi-level question system, countdown timer, and engaging visual and sound effects to enhance the user experience. Focused on creating a responsive interface and smooth gameplay across devices.

APTU Interfaces Website   **Link preview**: https://splendorous-kulfi-f7f86d.netlify.app/

Aptu website, a sophisticated multi-interface platform. Aptu integrates various interfaces such as Home, About, Features, Subscriptions, and Support to provide users with a seamless and engaging experience. By ensuring user-centric design, integrated functionality, and responsive interfaces, Aptu offers a comprehensive solution that empowers users to navigate and interact with the system effortlessly.

Alfajri Ecommerce   **Link preview**: https://alfajri.so

I redesigned and optimized the login and registration systems**,** improving usability and providing a smoother user experience for customers. In addition, I revamped multiple website pages with a modern, responsive user interface, aligning the design with current trends and enhancing overall accessibility. To further enrich the platform, I integrated interactive elements using Swiper sliders, creating a more dynamic and engaging e-commerce experience that increased user interaction and satisfaction.

Training Certificates System & STC Website   **Link preview**: https://stciq.com/

I built a robust system for issuing electronic training certificates, incorporating QR code verification to ensure authenticity and reliability. To streamline operations, I also developed an admin panel that enabled easy management of certificates and user data. In addition, I designed and launched a responsive company website to effectively showcase services, publish news and updates, and enhance the organization's online presence.

E-learning Platform

I developed a comprehensive E-learning platform providing a wide variety of online courses, focusing on delivering an engaging and interactive learning experience. I designed an intuitive user interface to enhance learner engagement, facilitate seamless interaction with course materials, and maintain high content quality in collaboration with instructors. Additionally, I prioritized responsive design and optimized performance across devices, ensuring learners can access the platform anytime, anywhere with a smooth and consistent experience.

Anhar Agro Ecommerce   **Link preview**: https://anhaaragro.com/

I redesigned and optimized the login and registration systems, improving usability and providing a smoother user experience for customers. In addition, I revamped multiple website pages with a modern, responsive user interface, aligning the design with current trends and enhancing overall accessibility. To further enrich the platform, I integrated interactive elements using Swiper sliders, creating a more dynamic and engaging e-commerce experience that increased user interaction and satisfaction.

Portfolio Website   **Link preview**: https://portfolio-seven-jade-57.vercel.app/en

Designed and developed a personal portfolio website to showcase my web development projects, skills, and achievements. Implemented a responsive and modern UI/UX**,** ensuring seamless navigation across devices. Integrated interactive features to enhance user engagement and highlight project details effectively.
